Everything about AirKey –
explained in simple terms.

customers' needs <<

AirKey | The flexible access solution for offices

The modern working world is subject to dynamic conditions. New types of synergies across industries are gaining popularity. This results in shared office solutions. Flexibility and short response times are paramount for corporate success. AirKey is the ideal and flexible access solution for branch networks, shared office providers and private properties. With AirKey, the smartphone is the key and this offers several benefits.

Benefits at a glance:

- › Send access authorisations via the Internet
- › Free, web-based software
- › Quick installation thanks to modular cylinders

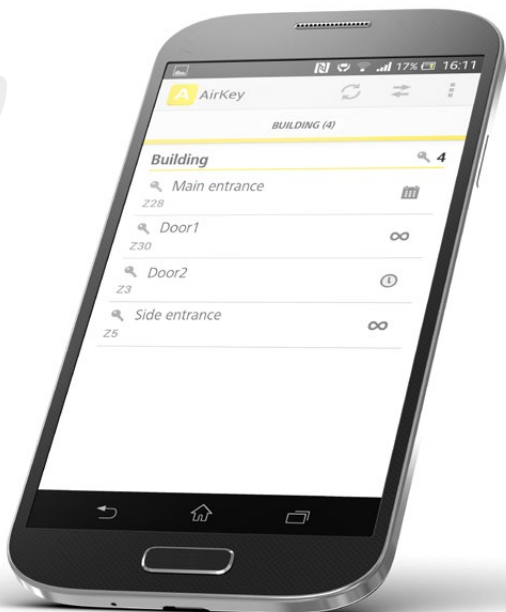

AirKey | Making smart homes perfect

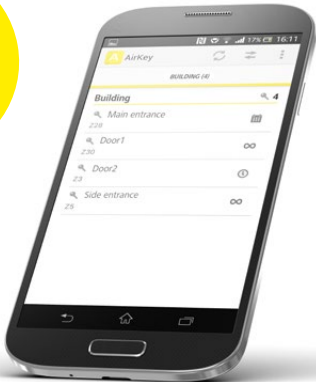

AirKey turns your smartphone into a key. This creates mobility, flexibility and opens up countless new forms of independence. Especially when friends come to visit, plumbers need access to clogged drains or you have asked your neighbour to water your plants while you are away. With AirKey, access authorisations are sent to all four corners of the world, within a matter of seconds.

AirKey benefits at a glance:

- › Smartphones unlock doors
- › Free AirKey app
- › Hand over keys online

AirKey | A smartphone with NFC functionality, Internet access and an AirKey cylinder. That's all you need.

Everything revolves around the smartphone.

In AirKey, the smartphone is the key. It unlocks doors and updates the cylinder. In addition, the AirKey app lists an overview of access authorisations and also monitors the battery status of AirKey cylinders. The smartphone also is the coding station that turns identification media into electronic keys in a quick and simple process.

All AirKey needs is a PC with Internet access.

The web-based software is free of charge. You can grant or revoke access authorisations, create locking systems enter KeyCredits and record access events in the online administration.

**AirKey cylinders and AirKey wall readers
make any door a smart door.**

And secure too. AirKey cylinders boast a trendy design that adapts perfectly to any door situation thanks to its modular design.

With the wall reader AirKey is now also available for sliding and swinging doors, turnstiles, lifts etc.

Both components are suitable for indoor and outdoor applications.

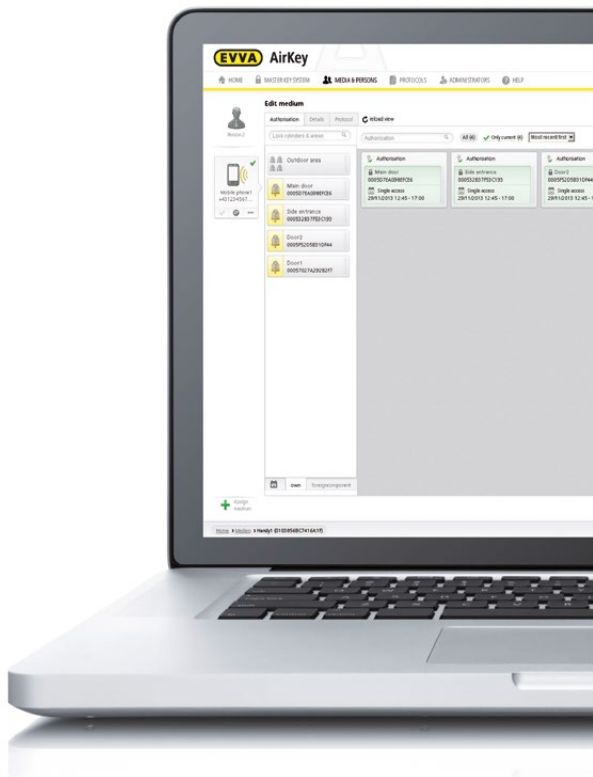

Flexibility with additional identification media.

No NFC smartphone available? In this case, smartphones quickly transform KeyCards or key tags into additional authorised ID media.

AirKey | Who is coming, who leaving?

Simple and online

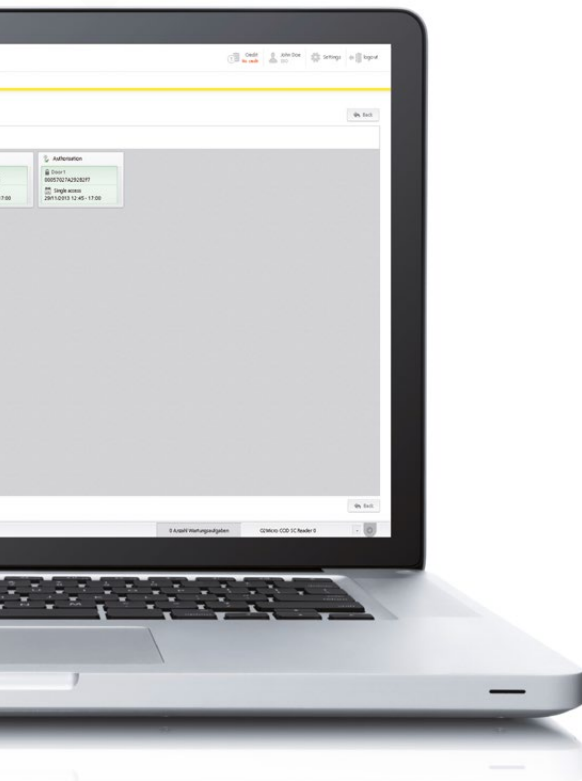

Hand over keys online from anywhere in the world.

Regardless of your current location, you will always have an overview of your locking systems. Access your event log in the AirKey online administration at any time. You can also grant or change access authorisations at all times. This is particularly convenient if you have to quickly respond to unexpected incidents.

The simple and secure
online administration
keeps track of everything.

One app with several smart functions.

The free AirKey app turns NFC smartphones into keys. It unlocks and synchronises cylinders, saves status data and transfers the data to the AirKey online administration when it connects to the online administration the next time. The AirKey app can be used as the key in as many locking systems as required.

AirKey | New keys in exchange for KeyCredits

Free software
with
Pay per key

Pay per key – only pay for what you need.

Use KeyCredits available from your EVVA-Partner.

Two options are available:

For systems with just a few users and/or infrequent changes to access authorisations, we offer KeyCredits 10, 50 or 100. KeyCredits Unlimited are designed for larger systems and frequent changes and offer validity periods of one to three years.

Why KeyCredits?

KeyCredits are required for new AirKey electronic keys or changes to access authorisations. Once the code concealed under the scratch field on KeyCredit cards is entered into the online administration you can – for instance – allow person 1 to access and exit door 1 and door 2 during certain times right away. Deleting access authorisations is free of charge.
